Now it's possible to execute multiple scripts at the same time, manage their progress and persist features, now available through Azure CLI and PowerShell.

Name

Description

RunPowerShellScript	Executes a PowerShell script
DisableNLA	Disable Network
DisableWindowsUpdate	Disable Windows Update
EnableAdminAccount	Enable administrator account
EnableEMS	Enable EMS
EnableRemotePS	Enable remote PowerShell
EnableWindowsUpdate	Enable Windows Update
FleetDiagnosticsWindows	Executes Fleet Diagnostics
IMDSCertCheck	Verify IMDS + m
IPConfig	List IP configurations
RDPSettings	Verify RDP Listen
ResetRDPcert	Restore RDP certificate
SetRDPPort	Set Remote Desktop port
WindowsActivationValidation	Verify Windows activation
WindowsGhosedValidationScript	Verify if 'ghosed'
WindowsUpgradeAssessmentValidation	Windows Upgrade Assessment

Run Command Script

RunPowerShellScript

Script execution complete

```
10 $installerPath = "C:\StorageSyncAgent_MS2022.ms1"
11 Invoke-WebRequest -Uri "https://aka.ms/agent/Server2022" -OutFile $installerPath
12
```

Run

Output

```
Directory: C:\

Mode                LastWriteTime         Length Name
----                -
d-----          9/26/2026   9:30 PM             OnPremShare
d-----          9/26/2026   9:30 PM             OnPremShare
Azure File Sync Agent installed successfully. Folder C:\OnPremShare created.
```

Server Manager

Server Manager Dashboard

Try Windows Admin Center and Azure Arc today

Instead of Server Manager, you can use Azure Arc and the new Windows Admin Center built into the Azure portal to manage individual servers and clusters on-premises and in Azure.

With Azure Arc you can secure and govern Windows Server at scale on-premises and across clouds.

Get more info at aka.ms/ManageWindowsServer

Sync group

Search

Overview

Monitoring

Add server endpoint

A server endpoint integrates an entire volume or a subfolder of a volume from a registered server as a location to sync. The following considerations apply:

- Servers must be registered to the storage sync service that contains this sync group before you can add a location on them here.
- A specific location on the server can only sync with one sync group. Syncing the same location or even a part of it – with a different sync group doesn't work.
- Make sure that the path you specify for this server is correct.

[Learn more](#)

Registered Server *

vm-onprem-serve

Path *

C:\OnPremShare

☐ Files [from this server path](#) have been brought to the cloud via DataBox or other means of seeding the cloud endpoint (Azure file share) in this sync group.

Cloud Tiering	Enabled
Initial Sync	

You may be trying to create a server endpoint on the server's system volume. Please note that you will not be able to enable cloud tiering on the system volume.

```
Administrator: Windows PowerShell
PS C:\Windows\system32> New-Partition -AssignDriveLetter -UseMaximumSize | Format-Volume -FileSystem NTFS -NewFileSystemLabel "SyncData" -Confirm:$false

DriveLetter FriendlyName FileSystemType DriveType HealthStatus OperationalStatus SizeRemaining Size
-----
E SyncData NTFS Fixed Healthy OK 31.91 GB 31.98 GB

PS C:\Windows\system32> $drive = (Get-Volume -FileSystemLabel "SyncData").DriveLetter
PS C:\Windows\system32> New-Item -Path "$($drive):\OnPremShare" -ItemType Directory -Force

Directory: E:\

Mode                LastWriteTime         Length Name
----                -
d-----          9/26/2026   9:59 PM             OnPremShare

PS C:\Windows\system32> Write-Output "New drive created at $($drive):\OnPremShare"
New drive created at E:\OnPremShare
PS C:\Windows\system32>
```

Microsoft Azure portal interface showing the 'Add server endpoint' configuration page for a sync group.

Cloud endpoint:

File share name	Storage account	Provisioning state	Change annotation
cloud-storage	StorageAccount01	Provisioned	Complete on 27/09/2024, 03:24:08

Server endpoints:

Server name	Path	Health	Permanent sync errors	Updated to cloud
No items found				

Add server endpoint configuration details:

- Registered Server:** Sync server
- Path:** E:\OnPremShare
- Cloud Tying:** Enabled
- Volume Free Space Policy:** Always preserve the specified percentage of free space on the volume (10%)
- Data Policy:** Retention (30 days)
- Initial Sync:** Merge the content of this server path with the content in the Azure file share. Files with the same name and path will then be compared. If the content is different, both versions of those files will be stored next to each other. If your server path or Azure file share are empty, delete removes the content.
